

Vacancy: Junior Technician Nonclinical Development

COMPANY:

ArthroGen B.V., a subsidiary of MeiraGTx B.V., is an Amsterdam based biopharmaceutical company developing local gene therapy for different indications, using viral mediated gene transfer. ArthroGen specializes in the development of viral gene therapy vectors, in particular adeno-associated virus (AAV) based therapeutics. Several product candidates are in the discovery and development phase. In our programs, we collaborate with world leading scientists.

POSITION:

ArthroGen is seeking a highly skilled and motivated technician to join our team. He/she will be involved in the execution of current and new projects, focusing on the generation of new AAV-based vectors targeting inflammatory and other diseases. The aim of these projects is to develop new product candidates for clinical testing. In addition, the research should generate new intellectual property to protect ArthroGen's future products.

The junior technician will perform laboratory and animal experiments to analyze the expression of therapeutic genes from our AAV vectors. He/she will investigate the bioactivity and specificity of the expressed therapeutic proteins using biochemical and cell culture techniques. The junior technician will also be involved in animal experiments and tissue analysis to demonstrate Proof of Concept of our product candidates. The technician will have a unique opportunity to participate in multidisciplinary projects with colleagues from ArthroGen, and MeiraGTx London and New York. He/she is reporting to the Head of Nonclinical Development.

EDUCATION AND EXPERIENCE REQUIREMENTS:

- MLO/HLO level or equivalent in Lifesciences, Biotechnology or equivalent
- Experience with molecular biological and biochemical techniques including PCR, ELISA, Western Blot, immune histochemistry.
- Experience with cell culture
- Art. 13f2 certification according to the Dutch Law on Animal Experimentation.
- Good communication and social skills
- Accurate, pro-active and well-organized
- Good documentation skills
- Flexible, positive, and professional attitude
- Proficient in English

ArthroGen offers the opportunity to work in an exciting and entrepreneurial environment. We allow you to grow within an organization that encourages talent, and that supports the development of its employees and fuels excellence. We are project focused and have built a culture with a high degree of

personal empowerment. Our energetic and enthusiastic employees participate in and influence the long-term growth of ArthroGen.

To apply, please send your full resume and motivation by e-mail to our Manager Operations Anouk Veneboer, e-mail: Veneboer@arthrogen.nl / Address: Meibergdreef 45, 1105 BA Amsterdam, The Netherlands. Phone: +31 20 566 2648. For questions related to the position, please contact Janneke Meulenberg (Managing Director: Meulenberg@arthrogen.nl).
